

POWER OF PREDICTABILITY

What does 65 years of breeding with the
same goal in mind get you?

*A consistent, predictable product that
has stood the test of time.*

45th Annual Production Sale

APRIL 1ST, 2021 • 1:00 P.M. at the ranch

Selling 220 Bulls & 20 Elite Registered Heifers

www.ArntzenAngus.com

Why are we so hung up on the "power of predictability" and what does that mean?

Our families have been raising registered black Angus cattle for 65 years, and over that span we haven't changed our philosophy. We strive for a herd of consistency and work towards the complete package in our animals. For us that package includes many traits; and it heavily weights docility, calving ease, udder quality, performance and fertility. The Angus mother cow continues to prove an ally in the ever-changing world Mother Nature throws our way; and the we feel the Angus breed lays the exact ground work our philosophy is built upon.

Sticking to our philosophy, we have intentionally stacked generation after generation of these valuable traits into the background of each of our animal's genetics. We feel chasing a specific trait in the short-term doesn't prove successful in the long-run. We believe in building from a solid base, and we require our animals to uphold our expectations from generation to generation. This is pivotal to our goal of providing customer satisfaction – producing a quality animal that provides you assurance in our product and what you can expect....hence the "power of predictability."

This year's offering of bulls runs unbelievably deep with consistency across all pens; it has been tough to isolate a lower end. We're eager to introduce new sires A A R Knudson 8241, A A R Justified 8244 and Musgrave 316 Stunner while also showcasing our proven genetics in Justified and Load Up sons. We have culled the bottom 45% of our calf crop to ensure the best product for our customers. Through sound breeding decisions, we have been able to raise bulls that have more performance (no creep) and are just as sound structurally (no hoof trimming). We continue to stand behind our bulls; and expect them to perform for you. In addition to our yearling bulls, we're also offering 20 high quality yearling registered heifers.

We've been feeding at Hould's Feedlot in Malta, MT for six years and we couldn't be happier with the job that they do. Bulls are fed on a high roughage ration to ensure structural soundness when they are turned out to pasture. All bulls have passed fertility examination; and have been DNA analyzed through Zoetis HD50K. This DNA analysis provides increased accuracy of each animal's EPDs; allowing you improved confidence in the accuracy of how a bull's offspring will perform.

Although the past 12 months have been anything but consistent or certain; one thing that has become evident is that rural America is the envy of the world. There is a new-found appreciation, or realization of the "perks" our lifestyle holds. Folks want to live where we live, they want their kids to go to our schools, and they want to raise their families in our communities. The challenges we're experiencing through a pandemic and through natural disasters prove that our communities and towns are a sense of family and reassurance. Neighbors help neighbors, we navigate the elements and get to work outside and use our hands, we share one another's worries and we get to celebrate one another's successes.

What a unique opportunity! We are proud to pass our knowledge and experiences on to our next generations; and we are humbled to share and continue this lifestyle alongside our customers. We have been doing business with our neighbors for 45 years; and we look forward to continue building our long-term relationships into the future proving the "power of predictability."

Our industry is a fantastic gathering of friends, family and neighbors – and we'd like to thank our families for their continued dedication and support to our business. Additionally, special thanks to Todd & Eva Foran for their many years of service to our ranch. Todd will have a number of his own bulls in the sale, all bred alongside ours. Tim & Mary McAllister and new faces Logan & Megan Tomschin also bring years of experience and hard work to our operation. Also, a special thank you to Kimberly Hansen for her hard work on the photographs, and to Amber Arntzen for her dedication to advertising and the catalog design.

We hope to see you on April 1st at the ranch! Join us for CAB lunch at noon with sale to follow at 1:00. The sale cattle are available for inspection at the ranch anytime. We'll be hosting a burger fry Wednesday evening at 5:30 at the sale barn. This is a great time to preview the cattle and visit with friends. If you cannot make the sale, the sale will be broadcast live on www.northernlivestockvideo.com.

Please feel free to contact any of us with any questions - we're looking forward to April 1st!

Delivery

Free delivery in Montana. Out of state delivery at cost. We enjoy delivering your cattle, but due to the busy season, we will rebate you \$100 per bull or \$50 per registered heifer that are picked up within 4 days of the sale. Commercial heifers are delivered at cost. We'll come and visit at a more convenient time.

Terms & Conditions

This sale is being conducted under the suggested sale terms and conditions adopted by the American Angus Association. Announcements from the block take precedence over information in this catalog.

Additional Information

Additional information will be available sale day. You can also check our website for current information and updates. Videos of the bulls will be available in mid-March at www.arntzenangus.com.

Genomic Enhanced EPDs

All of the bulls in the sale offering have had additional DNA testing to increase EPD accuracies and predictability. These animals are identified by the AngusGS and HD50K logos.

References

American Angus Association®, AHIR®, Angus Source®, CAB®, Pathfinder®. EPDs current as of February 26, 2021. Updated EPDs can be viewed at: www.angus.org and www.arntzenangus.com.

Liability

Arntzen Angus Ranch will not be held responsible for any accidents.

Retained Interest

We will be retaining a 1/3 revenue share interest on all bulls selling.

Health

All cattle selling are cleared for interstate shipment. All bulls have been fertility tested. All sale lots are free of all known genetic defects. NO CARRIERS SELL! All cattle are guaranteed. We expect them to perform for you. Please notify us if you have an injury or a breeding problem. Special thanks to Dr. Dick Rath, Lewistown, MT for herd health assistance.

Online Bidding

Bid through Northern Livestock Video Auction's NEW Online Bidding Platform! Desktop and Mobile Friendly!

For the Desktop: It is best to use the Google Chrome web

browser. Pre-Register at least one day prior to the sale. Go to

bid.northernlivestockvideo.com and click "Get Approved to Bid". Doing this will prompt you to create an account, after which you will fill out a bidder approval application. Once Approved, an email will be sent to the email account provided, please click the link in that email to activate your account and a buyer number will be provided. On sale day (after approval), visit www.northernlivestockvideo.com to view and bid!

For the Mobile: Use your mobile device to download the Northern App and follow the above steps to get approved. There is an instructional video on how to register to bid on our website, www.northernlivestockvideo.com if you have any questions.

For technical assistance with Internet Viewing and Bidding Questions, call Sam Fraser 406-860-0590.

Phone Bidding: Anyone wanting to use the Northern Livestock phone bank to bid must pre-register and have a bid number to bid on the phone.

To register with NLVA call 866-616-5035 Before Sale Day.

View the Online CATALOG and VIDEO CLIP of each BULL selling at www.northernlivestockvideo.com

Bidders who are successful in making purchases will be contacted following the sale to make payment and delivery arrangements.

Northern Livestock's Sale Day Bid Line: **1-406-245-0889.**

Accommodations

There are several nice motels in Lewistown. We would be happy to make your reservations for you.

Calving Ease ★★★ Dam Production 2 WR 105 2 YR 110						

Calving Ease Codes

In an effort to assist our customers with calving ease, we use a four star scale. We feel you can moderate birth weights and calving ease without giving up that much growth. But with the higher birth EPD and birth weight bulls, you can still expect a greater increase in weaning and yearling weights. We have coded the bulls in the following way.

- ★ Recommended for cows only.
- ★★ Mainly for cow use. Although some two star bulls would work on large capacity heifers. Their birth weights and EPDs combined with their pedigree would make them hard to recommend.
- ★★★ For heifer use. Many of these bulls will have the genetics to go on and be used on cows.
- ★★★★ For heifer use. These will be the easiest calving bulls of any in the sale.

Pathfinder® (#)

The pound sign in a pedigree represents an animal that has qualified as a Pathfinder®.

In order for a cow to be qualified as a Pathfinder she must meet three criteria:

1. Their first calf must be born near the herds average age for first calving.
2. They must maintain a regular calving interval. The maximum calving interval is 365+ (30 days/number of calving intervals).
3. The cow must produce at least 3 calves with an average weaning weight ratio of 105 to qualify for the report. A minimum of 10 contemporaries must be evaluated together each year to determine the weaning weight.

We put a lot of value in Pathfinder cows. We feel that it is a very good way to sort out the superior cows. Some of our top cows still won't qualify for Pathfinder for reasons that are out of our control. Some such reasons would be flushing a cow, or if a calf dies.

Docility (Doc)

Docility is something that we have focused on since we started in the Angus business over 60 years ago. The American Angus Association is now producing a docility EPD that we are finding to be very valuable as an assist for a purchaser when looking at temperament of a bull. We decided to include it in the lot block with a higher number being more favorable.

Below is the American Angus Associations definition.

Expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Selection Tools

Maternal Weaned Calf Value (\$M)

Maternal weaned calf value (\$M) is the most maternally-focused selection index currently available to Angus members and commercial users of Angus genetics. \$M, expressed in dollars per head, aims to predict profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves.

\$M places greater emphasis on the cost side of commercial cow-calf production than any tool available in the past. Increased selection pressure on \$M aims to decrease overall mature cow size while maintaining weaning weights consistent with today's production. Under \$M selection, less emphasis is placed on maternal milk, while heifer pregnancy and docility have an increased emphasis, and foot traits start to improve. The index finds cattle that are most profitable when producers receive no economic benefit for traits affecting post-weaning performance.

For example if Bull A has a \$M of +75 and Bull B has a \$M of +55 and both are mated to a comparable set of females, one would expect, on average, for Bull A's progeny to be \$20 more profitable per head for the cow/calf producer.

EPDs directly influencing the index include: calving ease direct and maternal, weaning weight, maternal milk, heifer pregnancy, docility, mature weight as well as foot angle and claw set.

Weaned Calf \$Value (\$W)

Weaned calf value (\$W) provides the expected dollar-per-head difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Overtime, increased selection pressure on \$W will increase weaning and yearling weight traits while also continuing to increase mature cow size. As with any \$Value, \$W only has meaning when used in comparing the relative merit or ranking of two individuals.

EPDs directly influencing \$W include: birth weight, weaning weight, maternal milk and mature cow size (MW).

Beef \$Value (\$B)

Beef value (\$B) facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B is a terminal index representing the expected average dollar-per-carass difference in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid. EPDs directly influencing \$B include: weaning and yearling weight, dry matter intake, as well as carcass weight, marbling, ribeye area and fat.

\$B only has meaning when two animals are compared against one another. For instance, if Bull A has a \$B of +90 and Bull B has a \$B of +120, one would expect, on average, the progeny of Bull B to be \$30 (\$120 - \$90 = \$30) more profitable per carcass due to feedlot gain and carcass merit assuming both bulls were randomly mated to comparable females.

The resulting \$B value is not designed to be driven by one factor, such as quality, red meat yield or weight. Instead, it is a dynamic result of the application of commercial market values to Angus genetics for both feedlot and carcass merit.

Heifer Pregnancy (HP)

Another EPD that we have started watching very closely is Heifer Pregnancy. You will see it mentioned in our footnotes. A higher number is more favorable. We often times refer to it in % Ranking against the rest of the breed. In that situation, 1% is the best with 95% being the poorest.

Below is the American Angus Associations definition.

A selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Why Angus?

Expected progeny differences (EPDs) are not directly comparable among different breeds of beef cattle. For this reason, each year the US Meat Animal Research Center publishes across breed EPD adjustments so cattlemen can put each breed on an even playing field. The chart below depicts what an average bull's EPDs of a different breed would be if adjusted to the Angus scale. For example if the average Hereford animal was placed into the Angus database, the Hereford's birth weight EPD would be +4.7, 3.4 more pounds compared to the average Angus bull. This chart demonstrates Angus cattle provide the best combination of growth, calving ease, and carcass traits relative to other breeds.

Angus Offers the Best Combination of Growth and Calving Ease

Average EPDs, 2014 Birth Year, Angus Base

First Annual
ARNTZEN ANGUS
Signature
FEMALE SALE

We are excited to announce our first annual commercial female sale on Friday, November 12, 2021 at Lewistown Livestock Auction. We're offering our customers a platform to market high quality replacement and bred females. We encourage cattle with a heavy influence of Arntzen Angus genetics or Angus bred to AAR bulls. The sale will be a well-advertised event sponsored by Arntzen Angus.

Looking forward to this opportunity, we are excited to make this an annual event. Let us know if you are interested in consigning females. Any size consignment is welcome. Please let us know if we can assist with selections. Contact Kevin, Brad or Derik, or Kyle at Lewistown Livestock or Dan at Deichmann Livestock with questions or to get consignment details.

Arntzen Angus –

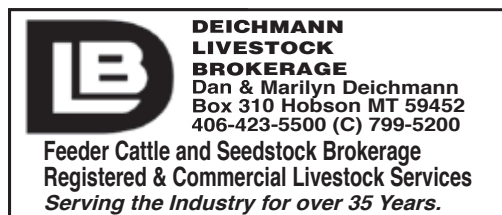

Over six decades of commitment to their customers...

The Arntzen family has built a reputation for quality and service to their commercial customers for over 60 years. It's our pleasure to now be an additional marketing arm to this top Central Montana Angus program, for feeder purchasing and marketing. With our 35 years of service to the commercial and registered livestock industry, DLB is excited to provide another avenue to market your calves, yearlings and seedstock that carry Arntzen Angus breeding.

We are also looking forward to November 12, 2021 for the inaugural Arntzen Signature commercial bred female sale that further expands the service to their customers with a female marketing event, specifically for spotlighting Arntzen Angus genetics. Here's an outstanding opportunity for you, their commercial customers.

Whether you have feeder calves, yearlings or females for the fall sale event, if I can be of assistance, please give me a call, or visit with me sale day.

Sincerely,
Dan Deichmann
Deichmann Livestock Brkg.

Justified is currently one of the top sires nationwide. He ranks in the top 1% of the breed for \$M and its easy to see why. His daughters are doing a tremendous job. They are moderate framed with tons of rib and a beautiful, feminine front end. They also exhibit great udders and feet with added fertility. His sons have been some of our best year in and year out. Calving ease, thickness, soundness and fertility. He has 279 daughters who have produced 462 progeny that have averaged 101 for weaning.

- We are excited offer to our first set of Knudson calves. His calves have been very consistent from calving to weaning and yearling performance.
- He sires extra length and great rib. Most importantly he stands on a near perfect set of feet.
- He is a maternal brother to Frontman 3132. Blackbird 9044 has proven to be one of the best AAR has ever produced. She will go down as maybe the most influential cow in our history. She has 67 calves reported to date raising 12 herd bulls going to purebred breeders and 28 daughters retained in the herd.
- Knudson is leased to Breeder Link.

- Consistent was our pick of the 2017 Ellingson Spring sale and we couldn't be happier with the calves he has sired. His progeny are long bodied, have great thickness, depth of rib and are super sound footed.
- He has proven to work excellent on heifers. This is the second year of calving daughters and we are super pleased with how they have done.

• This is our second set of Load Up sons to sell and last year they were some of the most sought after in the sale. We have used Load Up with success on heifers for three years now. His calves are clean made, deep bodied and exhibit extra length. We are calving his first set of daughters and they are doing a great job. They have good temperament, very good udders and stand on excellent feet. 7104 ranks in the top 1% of the breed for both claw and angle.

• This will be our second crop of Stunner calves and he has proved himself as an excellent breeding bull. He is a 316 son with added length and loaded with style and muscle.
• We calved daughters this year and have been very pleased with their fleshing ability and udder quality.

• Frontman progeny have been very popular. He sires calving ease, very sound structure and good performance. Progeny averages 409 BR 98, 413 WR 100, 252 YR 101.
• Blackbird 9044 has proven to be one of the best AAR has produced. She will go down as maybe the most influential cow in our history. She has 67 calves reported to date raising 12 herd bulls going to pure bred breeders and countless daughters retained in the herd.
• His daughters have been excellent cows. They are very docile, have great udders, and have very good fleshing ability and capacity. Daughters are averaging 101 on nursing ratio with 94 calves reported.
• He is leased to Beef 360 where he has seen a very popular AI bull.

- 8244 is a maternal brother to Frontman and Knudson as well as the high selling bull of our 2019 production sale going to Lanning Angus Farms in Tennessee.
- His first group of calves performed very well with an average WR of 103 and YR of 108.
- A Justified son that will add performance and not sacrifice the maternal excellence of his dad.
- His dam Blackbird 9044 has proven to be one of the best AAR has produced. She will go down as maybe the most influential cow in our history. She has 67 calves reported to date raising 12 herd bulls going to pure bred breeders and countless daughters retained in the herd.

- Outside 514 was raised by Todd Foran who has worked with us and ran cattle with AAR for 40 years.
- He was a standout bull in our 2016 sale going to Krebs Ranch in Gordon, Nebraska.
- He has produced top sire groups for Krebs Ranch their last two bull sales.
- He sires tons of performance and very stylish type cattle.
- Jet Princess 714 was a super deep ribbed and high capacity cow. She had a well balanced, pretty udder with excellent milk.

Knockout was the \$18,000 top selling bull to Grant Nielsen of Lynch NE. . He has been a great breeder and we will have a lot of his offspring in the future. His calves are long made and moderate framed with loads of eye appeal. Knockout's dam, A A R Chloe 2629, is one of our top cows and phenotypically is as nice as it gets. She has a beautiful front end and has as much spring of rib as you can find. She is also the dam of our herd sire, A A R Foreman 7733.

Calving Ease ★★ ★ Dam Production 7 WR 107 7 YR 109

- Load Up 0198 is the first of four full brothers to sell out of the powerful donor Blackbird 9044
- He has been a standout since early spring and boasts a moderate birth weight and top 10% WW and YW. Top 1% Docility and top 1% and 10% on his foot EPDs.
- Donor dam currently has reported 67 progeny and has sold 12 herd sires through our sale or retained in the AAR herd. There are 28 daughters currently working in our herd.
- Flush brothers sell as lots 34, 95, and 104. Flush sister sells as lot 221.

- Blackbird 9044 is going to go down as one of the most influential cows in the history of AAR.
- She has frozen 144 embryos on 5 flushes and we will continue to flush her.
- She has produced 12 herd sires through this production sale or retained by AAR. Most well known retained sire is A A R Frontman 3132 and most recently A A R Knudson 8241.
- She has 5 ET calves selling in this offering. Four bulls and one heifer by Load Up sell as lots 5, 34, 45, 104 and 221.

Here is a bull that does a lot of things right. Phenotypically, he is moderate framed with a extra length and a thick quarter. He will provide calving ease and fertility for his offspring. He ranks in the top 1% for both birth weight and Calving Ease Direct. He also ranks in the top 10% for Heifer Pregnancy and 15% for Scrotal Circumference. Maternal traits are bred deep into this pedigree and his \$M is in the 10th percentile. He also does an excellent job on the preweaning traits as he ranks in the top 4% of the breed for \$W.

- Full brother to Lot 69, 71, 125, 141 and 205. They are ET Load Up's out of a great cow. "4643" is the dam of the top herd sire A A R Justified 6708 who sold in our 2017 Annual Production Sale to Kel McC Angus, Turner MT. He is doing a great job for them and we have quite a few daughters in our herd. They are great young females with extra spring of rib, good udders and a calm temperament.
- This bull has really good feet.

• Full brother to Lot 69, 71, 115, 141 and 205. They are ET Load up's out of a great cow. "4643" is the dam of the top herd sire A A R Justified 6708 who sold in our 2017 Annual Production Sale to Kel Mcc Angus, Turner MT. He is doing a great job for them and we have quite a few daughters in our herd. They are great young females with extra spring of rib, good udders and a calm temperament.

• The cow side of this pedigree is stacked up. Granddam is a Pathfinder who records 7 WR 104 and 6 YR 104. Great granddam is also a Pathfinder and she posts 10 WR 104 and 9 YR 105.

• The \$M is a relatively new index from the American Angus Association and we feel it does a great job of identifying animals that will do a good job of building females. "0543" ranks in the top 1% of the breed for \$M so I would expect some great females to be sired by this bull.

• Top 4% Doc, 10% Angle, 15% CED, CEM, 20% HP, claw, \$W, \$C.

• Here is a good opportunity to put a group of full brothers in your herd.

Full brother to Lot 69, 71, 115, 125, 141 and 205. They are ET Load Up's out of a great cow. "4643" is the dam of the top herd sire A A R Justified 6708 who sold in our 2017 Annual Production Sale to Kel McC Angus, Turner MT. He is doing a great job for them and we have quite a few daughters in our herd. They are great young females with extra spring of rib, good udders and a calm temperament.

MOST VALUABLE PLAYER.

Bulls get a lot of hype. And rightly so. But, the Angus cow? Now, she's valuable.

She adds a lot to your business. She's maternal. She works in any environment. And, she's always at the top of her game delivering better calving ease, milk, faster growth and superior marbling genetics. Make America's cow your Most Valuable Player.

Angus. America's Breed. Learn more at www.Angus.org/BusinessBreed or call 816-383-5100.

ANGUS
THE BUSINESS BREED

Registered Heifers

20 ELITE REGISTERED HEIFERS

Offering 20 of our elite yearling heifers picked right off the top. All registered heifers have been HD50K DNA tested to increase EPD accuracies and predictability. We will be offering to breed and pasture these registered heifers until mid-August at cost. Heifers will be guaranteed bred.

Donation Heifer

photographer, and crew*

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	28	Milk	33
Birth Weight	21	Mature Weight	11
Weaning Weight	26	Mature Height	8
Yearling Weight	21	Carcass Weight	9
Dry Matter Intake	8	Yearling Height	11
Scrotal Circumference	13	Carcass Marbling	9
Docility	10	Carcass Ribeye	12
Heifer Pregnancy	14	Carcass Fat	10

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k or i50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.

www.angus.org

COMMITMENT.

Raising quality registered Angus cattle takes commitment.
As your genetic supplier, we take that seriously.

That's why we participate in MaternalPlus®.
Through MaternalPlus, we devote extra time to tracking maternal traits beyond those normally required, ultimately targeting greater performance and predictability.

The data we choose to gather through this inventory-based program today sets the stage for reproductive and lifetime productivity tools tomorrow — tools to pioneer new ways of selecting the most profitable animals.

Herd improvement starts with smart decisions.
A commitment to the female starts with MaternalPlus.

Contact AGI at 816-383-5100 or agi@angus.org for more information.

ANGUS MEANS BUSINESS.

Sale Notes

Thank you to all
those who have made
the last 45 years a
wonderful success!

After 65 years of breeding Angus cattle, our philosophy at Arntzen Angus Ranch has stayed the same. We breed cows to be trouble free. They must be easy fleshing, high capacity cows with good feet and udders. Late calvers and poor dispositions are not tolerated. We want light birth weight and moderate framed calves, with exceptional growth and thickness. A strong emphasis is also put on maternal and carcass traits.
