

POWER OF PREDICTABILITY

What does 66 years of breeding with the
same goal in mind get you?

*A consistent, predictable product that
has stood the test of time.*

46th Annual Production Sale

APRIL 7TH, 2022 • 1:00 P.M. at the ranch

selling 200 Bulls & 20 Elite Registered Heifers

www.ArntzenAngus.com

In 2021 mother nature continued to challenge the producers of our area in ways most of us have never experienced. We all had to navigate threatening wildfires, grasshoppers and drought, but people stood strong. Our industry is an amazing gathering of friends, family, and neighbors and these tough times once again prove the value of family and community. We will continue to lean into these relationships as 2022 unfolds.

The cattle that were sound were able to travel to the water hole regardless how far that drink might be during our drought stricken conditions. If a cow cannot survive the increasingly unknown conditions to breed back her, dollar value isn't relevant. That's why we work so hard on the practical traits that will help her succeed in any conditions.

Fads are going to come and go but AAR will continue to do what we've done for the last 66 years – breed cattle that will help make our customers successful. We hold firm in our belief that long-term success and viability of a program is achieved with the mother cow first. We provide a reliable animal that combines not only performance but maternal traits that are critical for sustainability. Our herd must exhibit calm dispositions, ease of calving, good feet with sound structure; and they must be fertile with good udders. The mother cow is the corner stone to our program.

The set of bulls that we are offering this year is as deep as we have ever raised. We have some new sires which include Woodhill Complete, Ellingson Rangeland, and AAR Knockout 8732. Additionally, you'll see some familiar sires in KG Justified 3023 and GDAR Load Up 7104 among others. We have culled the bottom half of our crop to ensure the best product for our customers. They were raised without creep and their feet have not been trimmed. As in the past, they have been developed at Hould's Feedlot at Malta. Bruce and his crew continue to excel in preparing our bulls. The bulls are fed a high roughage ration to ensure structural soundness when they get to pasture.

All of the bulls have had a fertility examination and have been DNA tested through Zoetis HD 50K or Neogen Angus GS. This year we also ultrasounded the bulls for carcass quality – information will be available at sale day. The additional DNA analysis and carcass information provides increased accuracy of each animal to improve confidence in the purchase that you are making. In addition to our yearling bulls we are also offering 20 high-quality yearling registered heifers that are a specific example to the maternal emphasis we hold.

We extend a special thanks to Todd and Eva Foran for continued support to our operation. Todd will have several of his own bulls in the sale raised alongside ours. Logan and Megan Tomschin also bring value and experience to our operation, proving dependable hands regardless of the task.

We are eager to gather on April 7th at the ranch! Join us for a CAB lunch at noon with the sale to follow at 1:00. The sale bulls are available for inspection at the ranch anytime. Todd and Eva Foran will be hosting a burger fry Wednesday evening at 5:30 at the sale barn. This is a great time to preview the cattle and visit with friends. If you cannot make the sale, it will be broadcast on Northern Livestock Video. Please feel free to contact any of us with any questions. We are looking forward to April 7th!

Commercial Marketing

Delivery

Free delivery in Montana. Out of state delivery at cost. We enjoy delivering your cattle, but due to the busy season, we will rebate you \$100 per bull or \$50 per registered heifer that are picked up within 4 days of the sale. Commercial heifers are delivered at cost. We'll come and visit at a more convenient time.

Terms & Conditions

This sale is being conducted under the suggested sale terms and conditions adopted by the American Angus Association. Announcements from the block take precedence over information in this catalog.

Additional Information

Additional information will be available sale day. You can also check our website for current information and updates. Videos of the bulls will be available in mid-March at www.arntzenangus.com.

Genomic Enhanced EPDs

All of the bulls in the sale offering have had additional DNA testing to increase EPD accuracies and predictability. These animals are identified by the AngusGS and HD50K logos.

References

American Angus Association®, AHIR®, Angus Source®, CAB®, Pathfinder®. EPDs current as of March 2, 2022. Updated EPDs can be viewed at: www.angus.org and www.arntzenangus.com.

Liability

Arntzen Angus Ranch will not be held responsible for any accidents.

Retained Interest

We will be retaining a 1/3 revenue share interest on all bulls selling.

Health

All cattle selling are cleared for interstate shipment. All bulls have been fertility tested. All sale lots are free of all known genetic defects. NO CARRIERS SELL! All cattle are guaranteed. We expect them to perform for you. Please notify us if you have an injury or a breeding problem. Special thanks to Dr. Paul Brady, Lewistown, MT for herd health assistance.

Online Bidding

Bid through Northern Livestock Video Auction's NEW Online Bidding Platform! Desktop and Mobile Friendly!

For the Desktop: It is best to use the Google Chrome web browser. Pre-Register at least one day prior to the sale. Go to bid.northernlivestockvideo.com and click "Get Approved to Bid". Doing this will prompt you to create an account, after which you will fill out a bidder approval application. Once Approved, an email will be sent to the email account provided, please click the link in that email to activate your account and a buyer number will be provided. On sale day (after approval), visit www.northernlivestockvideo.com to view and bid!

For the Mobile: Use your mobile device to download the Northern App and follow the above steps to get approved. There is an instructional video on how to register to bid on our website, www.northernlivestockvideo.com if you have any questions.

For technical assistance with Internet Viewing and Bidding Questions, call Sam Fraser 406-860-0590.

Phone Bidding: Anyone wanting to use the Northern Livestock phone bank to bid must pre-register and have a bid number to bid on the phone.

To register with NLVA call 866-616-5035 Before Sale Day.

View the Online CATALOG and VIDEO CLIP of each BULL selling at www.northernlivestockvideo.com

Bidders who are successful in making purchases will be contacted following the sale to make payment and delivery arrangements.

Northern Livestock's Sale Day Bid Line: **1-406-245-0889**.

Accommodations

There are several nice motels in Lewistown. We would be happy to make your reservations for you.

Yogo Inn 406.535.8721

Super 8 Motel 406.538.2581

Calvert Hotel 406.535.5411

Calving Ease ★★ Dam Production 8 WR 108 8 YR 08

Calving Ease Codes

In an effort to assist our customers with calving ease, we use a four star scale. We feel you can moderate birth weights and calving ease without giving up that much growth. But with the higher birth EPD and birth weight bulls, you can still expect a greater increase in weaning and yearling weights. We have coded the bulls in the following way.

- ★ Recommended for cows only.
- ★★ Mainly for cow use. Although some two star bulls would work on large capacity heifers. Their birth weights and EPDs combined with their pedigree would make them hard to recommend.
- ★★★ For heifer use. Many of these bulls will have the genetics to go on and be used on cows.
- ★★★★ For heifer use. These will be the easiest calving bulls of any in the sale.

Pathfinder® (#)

The pound sign in a pedigree represents an animal that has qualified as a Pathfinder®.

In order for a cow to be qualified as a Pathfinder® she must meet three criteria:

1. Their first calf must be born near the herds average age for first calving.
2. They must maintain a regular calving interval. The maximum calving interval is 365+ (30 days/number of calving intervals).
3. The cow must produce at least 3 calves with an average weaning weight ratio of 105 to qualify for the report. A minimum of 10 contemporaries must be evaluated together each year to determine the weaning weight.

We put a lot of value in Pathfinder® cows. We feel that it is a very good way to sort out the superior cows. Some of our top cows still won't qualify for Pathfinder® for reasons that are out of our control. Some such reasons would be flushing a cow, or if a calf dies.

Docility (Doc)

Docility is something that we have focused on since we started in the Angus business over 60 years ago. The American Angus Association is now producing a docility EPD that we are finding to be very valuable as an assist for a purchaser when looking at temperament of a bull. We decided to include it in the lot block with a higher number being more favorable.

Below is the American Angus Associations definition.

Expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Selection Tools

Maternal Weaned Calf Value (\$M)

Maternal weaned calf value (\$M) is the most maternally-focused selection index currently available to Angus members and commercial users of Angus genetics. \$M, expressed in dollars per head, aims to predict profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves.

\$M places greater emphasis on the cost side of commercial cow-calf production than any tool available in the past. Increased selection pressure on \$M aims to decrease overall mature cow size while maintaining weaning weights consistent with today's production. Under \$M selection, less emphasis is placed on maternal milk, while heifer pregnancy and docility have an increased emphasis, and foot traits start to improve. The index finds cattle that are most profitable when producers receive no economic benefit for traits affecting post-weaning performance.

For example if Bull A has a \$M of +75 and Bull B has a \$M of +55 and both are mated to a comparable set of females, one would expect, on average, for Bull A's progeny to be \$20 more profitable per head for the cow/calf producer.

EPDs directly influencing the index include: calving ease direct and maternal, weaning weight, maternal milk, heifer pregnancy, docility, mature weight as well as foot angle and claw set.

Weaned Calf \$Value (\$W)

Weaned calf value (\$W) provides the expected dollar-per-head difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Overtime, increased selection pressure on \$W will increase weaning and yearling weight traits while also continuing to increase mature cow size. As with any \$Value, \$W only has meaning when used in comparing the relative merit or ranking of two individuals.

EPDs directly influencing \$W include: birth weight, weaning weight, maternal milk and mature cow size (MW).

Combined Value (\$C)

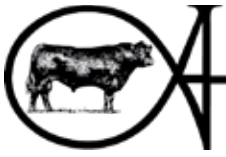

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

Heifer Pregnancy (HP)

Another EPD that we have started watching very closely is Heifer Pregnancy. You will see it mentioned in our footnotes. A higher number is more favorable. We often times refer to it in % Ranking against the rest of the breed. In that situation, 1% is the best with 95% being the poorest.

Below is the American Angus Associations definition.

A selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Foot Score

The most important trait for a cow is good feet. If she can't travel, it doesn't matter what traits she excels in ... she won't work out.

AAR learned that Montana State University was researching feet in the cattle industry, and we felt it was important to ask them to evaluate the AAR yearling bull-set this year. We have been scoring feet, internally ourselves for the last seven years, and we felt it was crucial to have an independent set of eyes on the bulls.

Jeremiah Peterson, of MSU, spent a brisk day in late January evaluating the bulls' feet and shared his independent scoring. The good news is that both an independent set of eyes and our AAR eyes judged the cattle in much the same way. Our average for claw set was 5.43, and for foot angle it was 5.24.

Thank you to MSU for letting us be a part of your study and we encourage other ranchers to also reach out to MSU to explore participating in this research opportunity.

FOOT SCORE GUIDELINES

Foot Angle (5 is ideal)

Claw Set (5 is ideal)

Buyers who make significant investments in cattle genetics expect them to last. Proper foot structure is essential to an animal's longevity, and Angus is leading the U.S. cattle industry in assessing an issue pertinent to all breeds — structural soundness.

The American Angus Association accepts foot scores from its members through a simple system aimed at the development of future decision-making genetic tools.

Breeders can score feet using two categories: foot angle and claw set. Problems with either area can affect soundness, and tools developed by the Association will assist producers in evaluating seedstock for their ability to propagate sound hoof structure.

Visit AAA Login at www.angus.org to get started.

First Annual ARNTZEN ANGUS *Signature* FEMALE SALE

We are excited to announce our first annual commercial female sale on Friday, November 11, 2022 at Lewistown Livestock Auction. We're offering our customers a platform to market high quality replacement and bred females. We encourage cattle with a heavy influence of Arntzen Angus genetics or Angus bred to AAR bulls. The sale will be a well-advertised event sponsored by Arntzen Angus.

Looking forward to this opportunity, we are excited to make this an annual event. Let us know if you are interested in consigning females. Any size consignment is welcome. Please let us know if we can assist with selections. Contact Kevin, Brad or Derik, or Kyle at Lewistown Livestock or Dan at Deichmann Livestock with questions or to get consignment details.

Hello Cattlemen and Cattlewomen;

We're excited to be part of the marketing arm for the Arntzen Angus program and we look forward to seeing you in the pens and at their annual production sale. The Arntzen family has developed a breeding program, going back over 66 years, based on experience and dedication to their customer's needs, and the environment the cattle will be raised in. This Angus program tests its cattle in the arid prairies and small grain stubble fields of Central Montana, between Hilger and Winifred. They are fed the same feedstuffs as their commercial cows, and the same as many customers and neighbors in the area. The cows must raise a big calf every year and must breed back readily, on time. The sons and daughters in the sale are the product of these strict production efforts.

The future and profitability in the beef business is always developed on quality. Our job is to support this impressive, steadfast family operation, and their loyal customers. Our feeder clients require consistent, high quality feeders, and the genetics sourced from this program is made to order. We continually are purchasing more feeders sired by Arntzen bulls, as the high quality is always there. Please give us a call when you're ready to market calves or yearlings or bred females and replacements. We look forward to seeing you at the Arntzen Sale April 7th.

Sincerely,
Dan Deichmann
Deichmann Livestock Brkg.

Justified is currently one of the top sires nationwide. He ranks in the top 1% of the breed for \$M and its easy to see why. His daughters are doing a tremendous job. They are moderate framed with tons of rib and a beautiful, feminine front end. They also exhibit great udders and feet with added fertility. His sons have been some of our best year in and year out. Calving ease, thickness, soundness and fertility. He has 390 daughters, 772 offspring averaging 101.

Justified 8244 is a maternal brother to Frontman 3132 and Knudson as well as the high selling bull of our 2019 sale going to Lanning Farms in Lebanon, Tennessee.
He adds a lot of power and performance. He's reported 46 calves averaging 103 on their weaning ratios and 34 yearling ratios averaging 105.
His dam, Blackbird 9044, has proven to be one of the best cows ever at AAR. She will go down as maybe the most influential cow in our history. She has 82 progeny reported to date raising 12 herd bulls going to seedstock operations.

• Consistent was our pick of the 2017 Ellingson Spring sale and we couldn't be happier with the calves he has sired. His progeny are long bodied, have great thickness, depth of rib and are super sound footed.
• He has proven to work excellent on heifers. This is the third year of calving daughters and we are super pleased with how they have done.

- Knudson has proven himself to be a very consistent breeder. Adding performance with extra length and rib. He stands on a near perfect set of feet and seems to pass that on to his progeny
- His dam, Blackbird 9044, has proven to be one of the best cows ever at AAR. She will go down as maybe the most influential cow in our history. She has 82 progeny reported to date raising 12 herd bulls going to seedstock operations.
- The first calf Knudson daughters are very docile, deep ribbed and have had great udders.

- Kendall offers a rare combination of calving ease, growth, maternal and carcass.
- Kendall will give you the maternal excellence of Justified with added growth and carcass merit.
- His donor dam was sound with a great udder and an average NR of 109 on 4 calves.
- The Kendall daughters are feminine and have well attached udders with small teats.

- The Foreman calves come easy with a lot of growth and have good dispositions.
- Foreman stems from 2 generations of Pathfinders® that were built much alike, moderate, big middled and sound. His dam posts progeny averages of 6 WR 109 and 5 YR 107 while his grandam records averages of 7 WR 105 and 5 YR 107. His dam is also the dam of A A R Knockout 8732, the \$18,000 top selling bull in our 2019 Annual Production sale to Grant Nielsen.

Calving Ease ★★		Dam Production 8 WR 108 8 YR 108				

- Starting the sale with one of 6 full brothers out of the matriarch Blackbird 9044.
- This bull has power, performance and is clean made. All these flush brothers will make awesome females.
- He is super sound scoring a perfect claw and angle on his foot scores to go along with top 4% Claw and 25% angle EPDs.
- He boasts real solid numbers across the board with top 4% WW, 10% YW, 2% Docility, 10% \$M, 4% \$F, 4% \$W and 5% \$C.
- Flush brothers sell as lot 2, 30,31,32, 75 and half brothers as lot 16.

- Blackbird 9044 is what "Power of Predictability" is all about. She is the dam of 8 bulls and maternal granddam of 7 in this offering. Expect big scrotal, docility, sound feet and performance.
- Her daughters are just as predictable. With 23 in production they have displayed superb udder quality, soundness, femininity and excellent production.
- Fertility also predictable, she has froze 175 embryos on 7 flushes and 90 progeny on the ground thus far.
- She has produced 12 herd sires through this production sale or retained by AAR. Most well know sires are AAR Frontman 3132, AAR Justified 8244, and AAR Knudson 8241.
- Dam of 8 bulls in this offering and 1 heifer. Dam of lots 1, 2, 16, 30, 31, 32, 75, 179 and 207.

A A R Blackbird 9044 at 12 years old.

A A R STUNNER J227

- This full brother to lot 1 has a lot of the same attributes.
- He's got style and stands on excellent feet also scoring a perfect claw and angle. With top 10% claw and 15% angle EPDs to go with them.
- Flush brothers sell as lot 1, 30, 31, 32, 75 and half brother as lot 16.
- Ribeye ratio 114

KOUPALS TRAILBOSS

Bull Born: 01/05/21 | Reg Number: 20158282 | Tattoo: 1048

During our visit to Koupals, Trailboss was the bull in the pen that kept you going back to him. He is extremely long, deep-bodied with added bone and muscle standing on very good feet. Once we got to see his dam and granddam, we knew that he is a bull that can have a positive impact in our herds.

Special Thanks

*to all of those who make our
program successful!*

*Thanks to Mike Vanek and his crew, and Karla
Knox and Jolene Ehlert for their great job
clipping the cattle, and Amber Arntzen for
advertising and her work on the sale catalog.*

Todd & Eva Foran

Logan & Megan Tomschin

*Special thanks to
Tim & Mary McAllister for
your many years of service!
Enjoy retirement!*

Dr. Bill Peebles

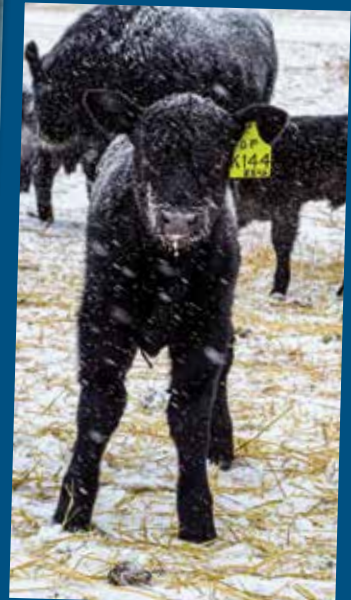

*Bruce, Linda and Lance Hould,
and all the feedlot crew.*

*Kimberly Hansen,
photographer, and crew*

Thank you to all
those who have made
the last 46 years a
wonderful success!

After 66 years of breeding Angus cattle, our philosophy at Arntzen Angus Ranch has stayed the same. We breed cows to be trouble free. They must be easy fleshing, high capacity cows with good feet and udders. Late calvers and poor dispositions are not tolerated. We want light birth weight and moderate framed calves, with exceptional growth and thickness. A strong emphasis is also put on maternal and carcass traits.
