

POWER OF PREDICTABILITY

What does 67 years of breeding with the same goal in mind get you?
A consistent, predictable product that has stood the test of time.

APRIL 6TH, 2023 • 1:00 P.M.
47th Annual Production Sale at the ranch
Selling 205 Bulls & 20 Top End Yearling Heifers

www.ArntzenAngus.com

What an exciting time to be in the livestock business! There is ample moisture across much of our region in the form of snow, that will hopefully fill reservoirs and help to replenish springs that have needed it so bad. We're optimistic it will give our soil the moisture it needs to kickstart the grass this spring and carry through the summer.

On the price side, the cattle market continues to look stronger and stronger. It feels as if we're moving towards highs that haven't been seen before. It has been tough and trying in the recent years, with no lack of effort; but right around the corner is the position in the cattle cycle that we have been waiting for.

The past few years have tested the cattle herds, identifying those who can perform and reproduce with less than optimal resources and little input. Those who have remained strong point back to a quality female. At the core of our philosophy and the confidence in our program lies that female cow. When we talk about the Power of Predictability, nothing is more important to our operation than a predictable mother cow. A sound footed, well-mannered female with a good udder is key. And, one who breeds up on time and brings in a nice calf each year is the best money maker a rancher can have. That's why every decision that we make has the cow side in mind.

We are pleased to share this year's set of bulls, all stemming from productive females and we believe they will hold true to our Power of Predictability. The newer sire groups this year include: Tehama Tahoe B767, Woodhill Complete A130-C2, and U2 Coalition 206C to name a few. We also continue to use a few of our favorites that have continued to do an outstanding job for us such as KG Justified 3023, GDAR Load Up 7104 among others. We have culled the bottom half of our crop to ensure the best product for our customers. They were raised without creep and their feet have not been trimmed. As in the past, they have been developed at Hould's Feedlot at Malta. Bruce and his crew continue to excel in preparing our bulls. The bulls are fed a high roughage ration to ensure structural soundness when they get to pasture.

All of the bulls have had a fertility examination and have been DNA tested through Zoetis HD 50K or Neogen Angus GS. This year we also ultrasounded the bulls for carcass quality – information will be available sale day. The additional DNA analysis and carcass information provides increased accuracy of each animal to improve confidence in the purchase that you are making. In addition to our yearling bulls we are also offering 20 high-quality yearling registered heifers that are a specific example to the maternal emphasis we hold.

We extend a special thanks to Todd and Eva Foran for continued support to our operation. Todd will have several of his own bulls in the sale raised alongside ours. Logan and Megan Tomschin also bring value and experience to our operation, proving dependable hands regardless of the task.

We are eager to gather on April 6th at the ranch! Join us for a CAB lunch at noon with the sale to follow at 1:00. The sale bulls are available for inspection at the ranch anytime. Todd and Eva Foran will be hosting a burger fry Wednesday evening at 5:30 at the sale barn. This is a great time to preview the cattle and visit with friends. If you cannot make the sale, it will be broadcast on Northern Livestock Video. Please feel free to contact any of us with any questions. We are looking forward to April 6th!

Commercial Marketing

Delivery

Free delivery in Montana. Out of state delivery at cost. We enjoy delivering your cattle, but due to the busy season, we will rebate you \$100 per bull or \$50 per registered heifer that are picked up within 4 days of the sale. Commercial heifers are delivered at cost. We'll come and visit at a more convenient time.

Terms & Conditions

This sale is being conducted under the suggested sale terms and conditions adopted by the American Angus Association. Announcements from the block take precedence over information in this catalog.

Additional Information

Additional information will be available sale day. You can also check our website for current information and updates. Videos of the bulls will be available in mid-March at www.arntzenangus.com.

Genomic Enhanced EPDs

All of the bulls in the sale offering have had additional DNA testing to increase EPD accuracies and predictability. These animals are identified by the AngusGS and HD50K logos.

References

American Angus Association®, AHIR®, Angus Source®, CAB®, Pathfinder®. EPDs current as of March 3, 2023. Updated EPDs can be viewed at: www.angus.org and www.arntzenangus.com.

Liability

Arntzen Angus Ranch will not be held responsible for any accidents.

Retained Interest

We will be retaining a 1/3 revenue share interest on all bulls selling.

Health

All cattle selling are cleared for interstate shipment. All bulls have been fertility tested. All sale lots are free of all known genetic defects. NO CARRIERS SELL! All cattle are guaranteed. We expect them to perform for you. Please notify us if you have an injury or a breeding problem. Special thanks to Dr. Paul Brady, Lewistown, MT for herd health assistance.

Online Bidding

Bid through Northern Livestock Video Auction's NEW Online Bidding Platform! Desktop and Mobile Friendly!

For the Desktop: It is best to use the Google Chrome web browser. Pre-Register at least one day prior to the sale. Go to bid.northernlivestockvideo.com and click "Get Approved to Bid". Doing this will prompt you to create an account, after which you will fill out a bidder approval application. Once Approved, an email will be sent to the email account provided, please click the link in that email to activate your account and a buyer number will be provided. On sale day (after approval), visit www.northernlivestockvideo.com to view and bid!

For the Mobile: Use your mobile device to download the Northern App and follow the above steps to get approved. There is an instructional video on how to register to bid on our website, www.northernlivestockvideo.com if you have any questions.

For technical assistance with Internet Viewing and Bidding Questions, call Sam Fraser 406-860-0590.

Phone Bidding: Anyone wanting to use the Northern Livestock phone bank to bid must pre-register and have a bid number to bid on the phone.

To register with NLVA call 866-616-5035 Before Sale Day.

View the Online CATALOG and VIDEO CLIP of each BULL selling at www.northernlivestockvideo.com

Bidders who are successful in making purchases will be contacted following the sale to make payment and delivery arrangements.

Northern Livestock's Sale Day Bid Line: 1-406-245-0889.

Accommodations

There are several nice motels in Lewistown. We would be happy to make your reservations for you.

Yogo Inn	406.535.8721
Super 8 Motel	406.538.2581
Calvert Hotel	406.535.5411
Winifred International Suites	406.462.5323

Calving Ease ★★★		Dam Production 1 WR 117 1 YR 118				

Calving Ease Codes

In an effort to assist our customers with calving ease, we use a four star scale. We feel you can moderate birth weights and calving ease without giving up that much growth. But with the higher birth EPD and birth weight bulls, you can still expect a greater increase in weaning and yearling weights. We have coded the bulls in the following way.

- ★ Recommended for cows only.
- ★★ Mainly for cow use. Although some two star bulls would work on large capacity heifers. Their birth weights and EPDs combined with their pedigree would make them hard to recommend.
- ★★★ For heifer use. Many of these bulls will have the genetics to go on and be used on cows.
- ★★★★ For heifer use. These will be the easiest calving bulls of any in the sale.

Pathfinder® (#)

The pound sign in a pedigree represents an animal that has qualified as a Pathfinder®.

In order for a cow to be qualified as a Pathfinder® she must meet three criteria:

1. Their first calf must be born near the herds average age for first calving.
2. They must maintain a regular calving interval. The maximum calving interval is 365+ (30 days/number of calving intervals).
3. The cow must produce at least 3 calves with an average weaning weight ratio of 105 to qualify for the report. A minimum of 10 contemporaries must be evaluated together each year to determine the weaning weight.

We put a lot of value in Pathfinder® cows. We feel that it is a very good way to sort out the superior cows. Some of our top cows still won't qualify for Pathfinder® for reasons that are out of our control. Some such reasons would be flushing a cow, or if a calf dies.

Docility (Doc)

Docility is something that we have focused on since we started in the Angus business over 60 years ago. The American Angus Association is now producing a docility EPD that we are finding to be very valuable as an assist for a purchaser when looking at temperament of a bull. We decided to include it in the lot block with a higher number being more favorable.

Below is the American Angus Associations definition.

Expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Maternal Weaned Calf Value (\$M)

Maternal weaned calf value (\$M) is the most maternally-focused selection index currently available to Angus members and commercial users of Angus genetics. \$M, expressed in dollars per head, aims to predict profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves.

\$M places greater emphasis on the cost side of commercial cow-calf production than any tool available in the past. Increased selection pressure on \$M aims to decrease overall mature cow size while maintaining weaning weights consistent with today's production. Under \$M selection, less emphasis is placed on maternal milk, while heifer pregnancy and docility have an increased emphasis, and foot traits start to improve. The index finds cattle that are most profitable when producers receive no economic benefit for traits affecting post-weaning performance.

For example if Bull A has a \$M of +75 and Bull B has a \$M of +55 and both are mated to a comparable set of females, one would expect, on average, for Bull A's progeny to be \$20 more profitable per head for the cow/calf producer.

EPDs directly influencing the index include: calving ease direct and maternal, weaning weight, maternal milk, heifer pregnancy, docility, mature weight as well as foot angle and claw set.

Weaned Calf \$Value (\$W)

Weaned calf value (\$W) provides the expected dollar-per-head difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Overtime, increased selection pressure on \$W will increase weaning and yearling weight traits while also continuing to increase mature cow size. As with any \$Value, \$W only has meaning when used in comparing the relative merit or ranking of two individuals.

EPDs directly influencing \$W include: birth weight, weaning weight, maternal milk and mature cow size (MW).

Combined Value (\$C)

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

Heifer Pregnancy (HP)

Another EPD that we have started watching very closely is Heifer Pregnancy. You will see it mentioned in our footnotes. A higher number is more favorable. We often times refer to it in % Ranking against the rest of the breed. In that situation, 1% is the best with 95% being the poorest.

Below is the American Angus Associations definition.

A selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Don't buy an **imposter.**

Not all "Angus" bulls are **REGISTERED** Angus bulls.

If you see this logo in conjunction with an individual animal or group of animals, you know that that animal is registered with the American Angus Association and backed by the power of **data, programs** and **pedigrees** of the Association.

Invest wisely in those that carry the **Powered By Angus** logo.

Look for the **REGISTRATION NUMBER.**

DEDICATED. COMMITTED.

WHOLE HERD REPORTING WITH MATERNALPLUS

DEDICATED TO DATA.

Dedicated to Data. We devote extra time to collect maternal traits beyond those required to target greater performance and predictability. Our goal is to not only to improve our genetics today, but also prepare for the future of the Angus breed.

COMMITTED TO IMPROVEMENT.

Raising quality registered Angus cattle takes commitment. As your genetic supplier, we take that seriously. That is why we believe a commitment to the female starts with Maternal Plus.

Contact AGI at 816-383-5100 or agi@angus.org for more information

ANGUS

THE BUSINESS BREED

AAR is passionate about the mother cow and she truly lies at the heart of our program. The maternal characteristics of our herd heavily influence our end product to our customers - quality & predictable bulls that will add value and profitability for our customer.

Maternal Plus

Maternal Plus™ is a voluntary program that emphasizes the importance of the female and maternal-focused EPDs. These will continue to improve the industry and add transparency for our customers.

Whole Herd Reporting

- We report a starting inventory for each animal every year.
- Report breeding dates and sires.
- Report animal disposal dates and reason, such as death or reason sold.

This data is being used towards a longevity EPD to target animals whose offspring tend to 'stick around' longer. A long term producing cow is one of the most profitable units to a rancher's bottom line.

Foot Scores

- We score 2x annually: at weaning & at calving.
- Feet can change considerably in a year's time.

We cull feet harder than any other trait – if an animal won't travel, they won't work.

Udder Score

- We score annually at calving.
- Our preferred evaluation is after the cow has calved, but before the calf nurses for the first time.
- We evaluate the teat size and udder suspension.

Udder scoring plays into our culling decisions. We look for newborn calves to nurse without assistance.

Body Composition, Height, Weight & Disposition

- All 4 metrics taken annually at weaning.
- Reported annually to Association.
- Association can monitor the lifetime development of an animal.

Continual reporting of this information aids in phenotypical assessment and decision making for our breeding and culling decisions.

Second Annual
ARNTZEN ANGUS

Signature
FEMALE SALE

Last fall we had our first female sale and we couldn't have been happier with the results. Nearly 1,000 head of cows went through the ring and they received top price. We look forward to continuing on and making this sale an annual

event. The second annual commercial female sale will be on Friday, November 10, 2023 at Lewistown Livestock Auction. We're offering our customers a platform to market high quality replacement and bred females. We encourage cattle with a heavy influence of Arntzen Angus genetics or Angus bred to AAR bulls. The sale is a well-advertised event sponsored by Arntzen Angus.

Let us know if you are interested in consigning females. Any size consignment is welcome. Please let us know if we can assist with selections. Contact Kevin, Brad, Derik, Kyle at Lewistown Livestock or Dan at Deichmann Livestock with questions or to get consignment details.

Hello Cattlemen and Cattlewomen;

Without a doubt, in the next three years, cattlemen will witness the highest cattle prices ever. With the national cowherd in a liquidation period and having the smallest inventory numbers since the early '60's, we as producers need to be ready to capitalize on market momentum. Replacement females will be in demand like we've never seen, and the high quality kind will be at a substantial premium.

This year's set of bulls at Arntzen Angus will sire some of the highest valued feeders and replacement females to be found anywhere. Quality, along with breeder integrity, will be key over the next few years, and will be tied to programs like Arntzen's have built the past 70 years. You can count on seedstock with value and marketing strength from them.

With the debut of their new fall Signature Female Sale this past November, Arntzen Angus is adding one more value-added component to every bull they sell. This program adds marketing options and we encourage you, whether new or established as an Arntzen customer, to plan to participate in this female sale opportunity.

Deichmann Livestock is actively purchasing Arntzen genetics and is in the market for feeders and replacements now and down the road. We're interested in your ranch story and want to visit with you about this year's sale offering and how well it can fit your program. Please give us a call about marketing opportunities or stop and visit with us at the sale.

Sincerely,
Dan & Marilyn Deichmann

We selected Hannibal as our pick of the 2021 Pine Coulee Angus bull sale. We had been searching for a Charlo son to plug into our program and Hannibal fit perfect. He stems from an outstanding dam, Pine Coulee Everelda W3, and we feel the cross on Onward was just right. She adds frame, fertility and structural soundness making a very attractive package. Look to H316 for calving ease, length and eye appeal.

We retained 0549 from our 2020 calf crop. We selected him in large part because of the compatibility we have seen with our herd and Musgrave 316 Stunner. Those cattle have worked great in our herd and the cross on A A R Jeanne 1561, a 12 year old Justice daughter that is still actively working in our herd, is a can't miss pedigree. She is moderate with depth of rib, maternal strength and a great set of feet.

• We used Coalition because of his foot quality, muscle pattern and strong maternal traits. Our first set of sons exhibit excellent shape with a pedigree we can use on anyone. The females from this sire should be outstanding. Our yearlings look the part and we can't wait to breed them.

• Justified 8244 is a maternal brother to Frontman and Knudson as well as the high selling bull of the 2019 sale going to Lanning Farms in Lebanon, TN.

• He adds a lot of power and performance as well as frame over his sire. His progeny currently average 71 @ 102 WR and 44 @ 104 YR.

• His dam, Blackbird 9044, has proven to be one of the best cows ever at AAR. She currently has 92 progeny reported and has produced 16 herd bulls going to seedstock operations.

Derik and Corry were able to travel to Argentina with a group of Montanans.

Derik talking with Manu Olarra and Ben Griffin in Argentina.

Excited to have our friends, Manu and Nacho Olarra from Argentina come and visit the ranch during the summer.

A nice afternoon in the steep hills of West Virginia visiting our long time friend Jamie Kensey, of Kensey's Oak Front Farms.

Brad and Kevin went to Pennsylvania to spend time with their good friend John Joseph of JJ Angus.

MOST VALUABLE PLAYER.

Bulls get a lot of hype. And rightly so. But, the Angus cow? Now, she's valuable.

She adds a lot to your business. She's maternal. She works in any environment. And, she's always at the top of her game delivering better calving ease, milk, faster growth and superior marbling genetics. Make America's cow your Most Valuable Player.

Angus. America's Breed. Learn more at www.Angus.org/BusinessBreed or call 816-383-5100.

ANGUS
THE BUSINESS BREED

YOU'VE DONE THE WORK.

Get paid for it.

Get paid for the **records**.

Get paid for **quality** genetics.

Get paid for the power of **Angus**.

In 2021, AngusLink calves
earned an average
PREMIUM of \$13.01/cwt.

AngusLinkSM combines USDA Process Verified Programs with a Genetic Merit Scorecard that gives buyers confidence in your calves. From age and source verification to cattle care and handling, you choose which programs make the most sense for your operation.

Call us at 816-383-5100 to sign up or
visit [AngusLink.com](https://www.AngusLink.com) for more information.

ANGUSLINKSM
VALUE ADDED PROGRAMS

Registered Heifers

20 ELITE REGISTERED HEIFERS

Offering 20 of our elite yearling heifers picked right off the top. All registered heifers have been Angus GS DNA tested to increase EPD accuracies and predictability.

We will be offering to breed and pasture these registered heifers until mid-August at cost. Heifers will be guaranteed bred.

Donation Heifer: CMMC Cancer Center Campaign

The Cancer Center will bring comprehensive cancer care to Central Montana. One in 3 of us will be diagnosed with cancer in our lifetime. Not the diagnosed? You likely will know someone battling cancer or may well be the caregiver. AAR knows from first-hand experience that cancer affects all of us.

Annually our friends, our family, neighbors travel 165,000 miles for cancer care. 165,000 miles equals 647 times across the state. The Cancer Center will keep them safe, close to home.

A A R is donating half the proceeds of the sale of this heifer to the CMMC Cancer Center Campaign.

Special Thanks

to all of those who make our program successful!

Thanks to Mike Vanek and his crew, and Karla Knox and Jolene Ehlert for their great job clipping the cattle. Amber Arntzen for advertisements and her work on the sale catalog. As well as George Fisher for his help parking cars on sale day.

Todd & Eva Foran

Ultrasound Technician***

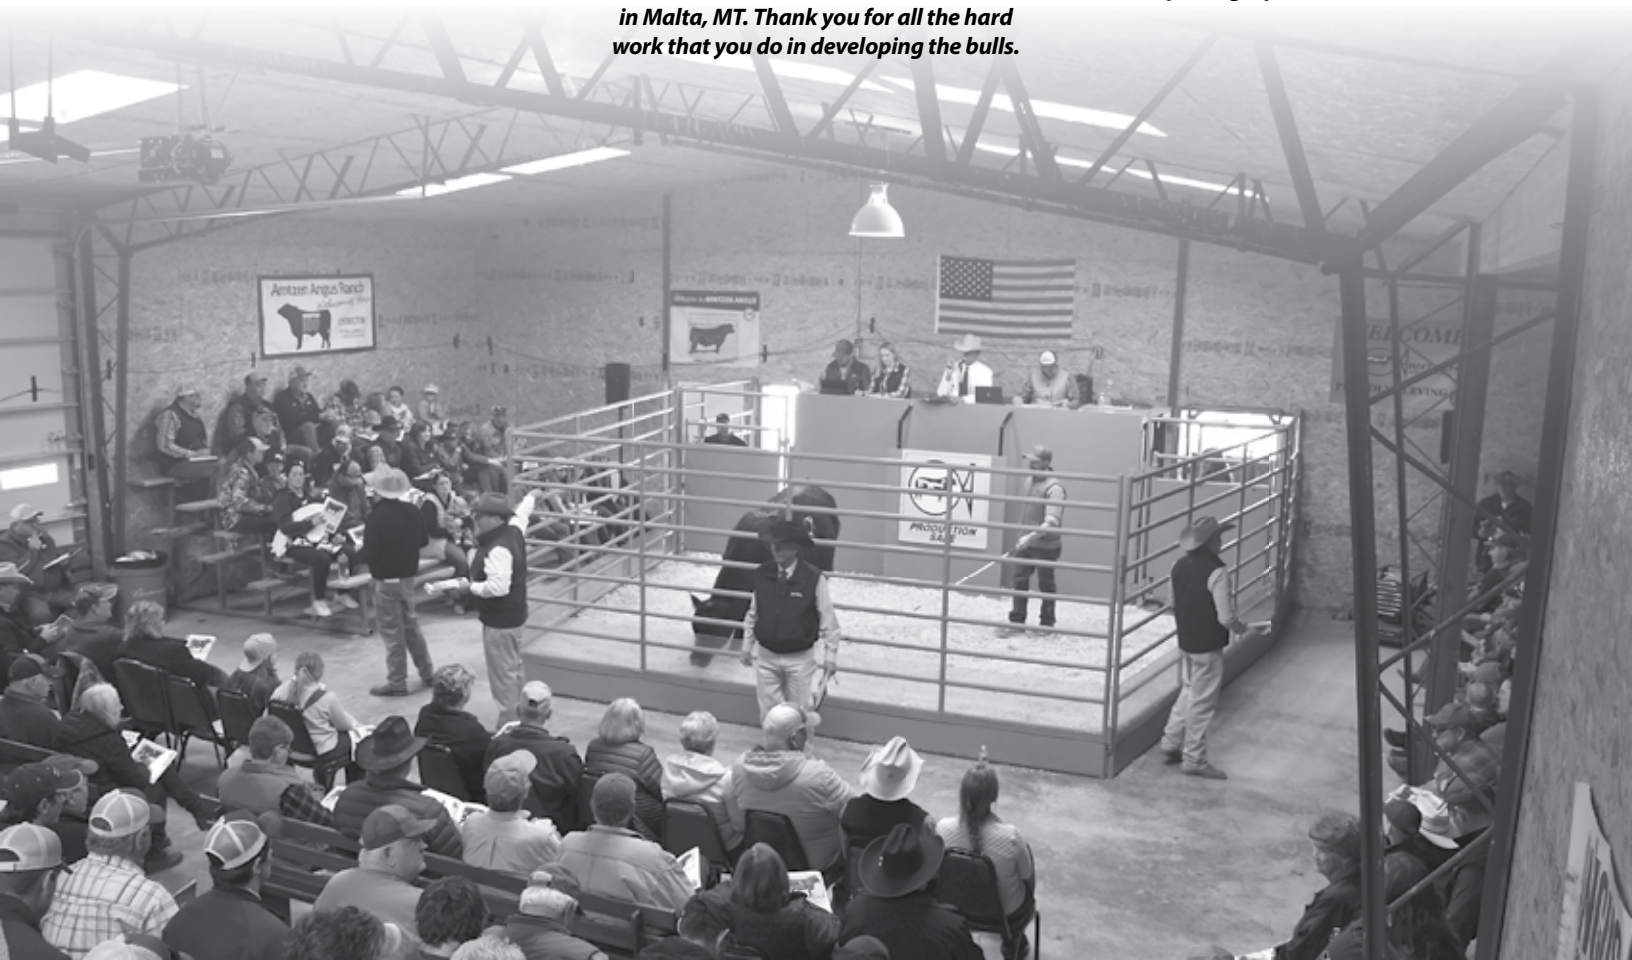

***Dr. Bill Peebles & Brigit Flanagan,
with the crew for fertility testing.***

***Doug, Todd and Kevin with Bruce and
Linda Hould, owners of Hould Feedlot
in Malta, MT. Thank you for all the hard
work that you do in developing the bulls.***

***Kimberly Hansen,
photographer, and crew***

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	28	Milk	33
Birth Weight	21	Mature Weight	11
Weaning Weight	26	Mature Height	8
Yearling Weight	21	Carcass Weight	9
Dry Matter Intake	8	Yearling Height	11
Scrotal Circumference	13	Carcass Marbling	9
Docility	10	Carcass Ribeye	12
Heifer Pregnancy	14	Carcass Fat	10

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k or i50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.

Why Angus?

This chart demonstrates Angus cattle provide the best combination of growth, calving ease, and carcass traits relative to other breeds.

Angus Offers the Best Combination of Growth and Calving Ease

Average EPDs, 2014 Birth Year, Angus Base

Breed	BW EPD	WW EPD	YW EPD	Milk
Angus	1.3	51	91	23
Hereford	5.6	40	49	3
Red Angus	1.2	26	53	23
Charolais	8.5	62	89	17
Gelbvieh	3.3	43	68	29
Limousin	3.6	45	51	13
Simmental	5.1	54	81	26

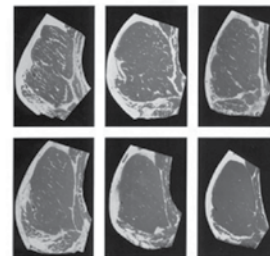

Kuehn and Thallman, 2016

Angus is Highest for Marbling and Carcass Weight

Average EPDs, 2014 Birth Year, Angus Base

Breed	Marbling EPD	Carcass Weight EPD
Angus	0.59	33
Hereford	-0.22	2
Red Angus	0.18	11
Charolais	-0.29	30
Gelbvieh	-0.18	28
Limousin	-0.44	15
Simmental	-0.20	32

Kuehn and Thallman, 2016

Transfer Information / Delivery Instructions

Please write the lot numbers, price and to whom the cattle are to be transferred. Tear out this page and hand it to the clerk.

Sale Notes

Thank you to all those who have made the last 47 years a wonderful success!

After 67 years of breeding Angus cattle, our philosophy at Arntzen Angus Ranch has stayed the same. We breed cows to be trouble free. They must be easy fleshing, high capacity cows with good feet and udders. Late calvers and poor dispositions are not tolerated. We want light birth weight and moderate framed calves, with exceptional growth and thickness. A strong emphasis is also put on maternal and carcass traits.
