

***POWER OF PREDICTABILITY***

What does 68 years of breeding with the same goal in mind get you?

***A consistent, predictable product that has stood the test of time.***

***APRIL 4<sup>TH</sup>, 2024 • 1:00 P.M.***  
**48th Annual Production Sale at the ranch**  
***Selling* 210 Bulls & 20 Top End Yearling Heifers**

[www.ArntzenAngus.com](http://www.ArntzenAngus.com)

As we prepared our welcome letter for this year's sale catalog, we referenced our recent past catalogs, reminiscing on what we've experienced recently as an industry; outside the details in our day-to-day chores and duties. It's not easy to forget the drought, the low prices, operations forced to cut their herds, and the shortage of hay. Those were tough times and certainly still affect many operations today.

But there are signs of a turnaround. We can almost taste the turning of the corner - how exciting it is to now see an appropriate and sound calf price, to see moisture (snow on the ground at time of print) and to see reassuring hay inventories across our area. It truly feels like things are lining up for producers to realize some of the best years that they have experienced -- money making years; and those are just what ranchers need.

Those who will successfully turn the corner are those who have remained true to, and trusted the mother cow. The herd with a solid female base is setup to weather our storms - be those literally from Mother Nature or economic storms. Those who keep the quality mother cow at the forefront of their herd are in the best position to succeed. At the core of our philosophy and the confidence in our program lies that female cow. When we talk about the Power of Predictability, nothing is more important to our operation than a predictable mother cow. A sound footed, well-mannered female with a good udder is key. And, one who performs with minimal input and breeds up on time, bringing in a nice calf each year is the best money maker a rancher can have. That's why every decision that we make has the cow side in mind.

We are happy to introduce this year's set of bulls, all stemming from productive females and we believe they will hold true to our Power of Predictability. The newer sire groups this year include: Tehama Tahoe B767, Woodhill Agenda G151-J043 and Sitz Stellar 726D. We continue to hold confidence in the performance of a few of our favorites like KG Justified 3023 and GDAR Load Up 7104 - you'll see a number of sons from these sires as well.

We cull the bottom half of our crop to ensure the best product for our customers. They were raised without creep and their feet have not been trimmed. As in the past, they are developed at Hould's Feedlot at Malta; and Bruce and his crew excel in preparing our bulls. The bulls are fed a high roughage ration to ensure structural soundness when they arrive to your pasture.

All of the bulls have had a fertility examination and have been DNA tested through Zoetis HD50K or Neogen Angus GS. This additional DNA analysis provides increased accuracy of each animal to improve confidence in your purchase. In addition to our yearling bulls, we are also offering 20 high-quality yearling registered heifers that are an intentional example to the maternal emphasis we hold.

We extend a special thanks to our operations' help. We are fortunate to have Logan and Megan Tomschin on our team. Their day-to-day help keeps the operation moving forward in a calm and consistent method. We are excited to welcome Brace and Haley Pingetzer and their young family to the ranch. They've quickly adjusted to central Montana and will be a valuable addition to the operations.

We are eager to gather on April 4th at the ranch! Join us for a CAB lunch at noon with the sale following at 1:00. The sale bulls are available for inspection at the ranch anytime. We will also host a meal on Wednesday (April 3rd) evening at 5:30 at the sale barn. This is always a great time to preview the cattle, or just catch up with friends. If you cannot make the sale, it will be broadcast on Northern Livestock Video. Please contact any of us with questions - we are looking forward to April 4th!

Commercial Marketing

## Delivery

Free delivery in Montana. Out of state delivery at cost. We enjoy delivering your cattle, but due to the busy season, we will rebate you \$100 per bull or \$50 per registered heifer that are picked up within 4 days of the sale. Commercial heifers are delivered at cost. We'll come and visit at a more convenient time.

## Terms & Conditions

This sale is being conducted under the suggested sale terms and conditions adopted by the American Angus Association. Announcements from the block take precedence over information in this catalog.

## Additional Information

Additional information will be available sale day. You can also check our website for current information and updates. Videos of the bulls will be available in mid-March at www.arntzenangus.com.

## Genomic Enhanced EPDs

All of the bulls in the sale offering have had additional DNA testing to increase EPD accuracies and predictability. These animals are identified by the AngusGS and HD50K logos.

## References

American Angus Association®, AHIR®, Angus Source®, CAB®, Pathfinder®. EPDs current as of February 23, 2024. Updated EPDs can be viewed at: www.angus.org and www.arntzenangus.com.

## Liability

Arntzen Angus Ranch will not be held responsible for any accidents.

## Retained Interest

We will be retaining a 1/3 revenue share interest on all bulls selling.

## Health

All cattle selling are cleared for interstate shipment. All bulls have been fertility tested. All sale lots are free of all known genetic defects. NO CARRIERS SELL! All cattle are guaranteed. We expect them to perform for you. Please notify us if you have an injury or a breeding problem. Special thanks to Dr. Paul Brady, Lewistown, MT for herd health assistance.

## Online Bidding

Bid through Northern Livestock Video Auction's NEW Online Bidding Platform! Desktop and Mobile Friendly!

**For the Desktop:** It is best to use the Google Chrome web browser. Pre-Register at least one day prior to the sale. Go to bid.northernlivestockvideo.com and click "Get Approved to Bid". Doing this will prompt you to create an account, after which you will fill out a bidder approval application. Once Approved, an email will be sent to the email account provided, please click the link in that email to activate your account and a buyer number will be provided. On sale day (after approval), visit www.northernlivestockvideo.com to view and bid!

**For the Mobile:** Use your mobile device to download the Northern App and follow the above steps to get approved. There is an instructional video on how to register to bid on our website, www.northernlivestockvideo.com if you have any questions.

**For technical assistance with Internet Viewing and Bidding Questions, call Sam Fraser 406-860-0590.**

**Phone Bidding:** Anyone wanting to use the Northern Livestock phone bank to bid must pre-register and have a bid number to bid on the phone.

**To register with NLVA call 866-616-5035 Before Sale Day.**

View the Online CATALOG and VIDEO CLIP of each BULL selling at www.northernlivestockvideo.com

Bidders who are successful in making purchases will be contacted following the sale to make payment and delivery arrangements.

Northern Livestock's Sale Day Bid Line: **1-406-245-0889.**

## Accommodations

There are several nice motels in Lewistown. We would be happy to make your reservations for you.

Yogo Inn . . . . . 406.535.8721

Super 8 Motel . . . . . 406.538.2581

Calvert Hotel . . . . . 406.535.5411

Winifred International Suites . . . . . 406.462.5323

Cottonwood Log Cabins . . . . . 406.538.8411

## Additional Contacts

Doug & Gayle Arntzen . . . . . 406.350.5553

Keith & Kris Arntzen . . . . . 406.462.5557 or 406.350.5557

Erik & Amber Arntzen . . . . . 406.462.5410 or 406.380.1447

**Be our guest for a CAB lunch starting at 12:00 p.m. Sale at 1:00 p.m. A pre-sale burger fry will be held at the sale barn on Wednesday starting at 5:30 p.m.**

Calving Ease ★★★ Dam Production 1 WR 122 1 YR 112						

## Calving Ease Codes

In an effort to assist our customers with calving ease, we use a four star scale. We feel you can moderate birth weights and calving ease without giving up that much growth. But with the higher birth EPD and birth weight bulls, you can still expect a greater increase in weaning and yearling weights. We have coded the bulls in the following way.

- ★ Recommended for cows only.
- ★★ Mainly for cow use. Although some two star bulls would work on large capacity heifers. Their birth weights and EPDs combined with their pedigree would make them hard to recommend.
- ★★★ For heifer use. Many of these bulls will have the genetics to go on and be used on cows.
- ★★★★ For heifer use. These will be the easiest calving bulls of any in the sale.

## Pathfinder® (#)

The pound sign in a pedigree represents an animal that has qualified as a Pathfinder®.

In order for a cow to be qualified as a Pathfinder® she must meet three criteria:

1. Their first calf must be born near the herds average age for first calving.
2. They must maintain a regular calving interval. The maximum calving interval is 365+ (30 days/number of calving intervals).
3. The cow must produce at least 3 calves with an average weaning weight ratio of 105 to qualify for the report. A minimum of 10 contemporaries must be evaluated together each year to determine the weaning weight.

We put a lot of value in Pathfinder® cows. We feel that it is a very good way to sort out the superior cows. Some of our top cows still won't qualify for Pathfinder® for reasons that are out of our control. Some such reasons would be flushing a cow, or if a calf dies.

## Docility (Doc)

*Docility is something that we have focused on since we started in the Angus business over 60 years ago. The American Angus Association is now producing a docility EPD that we are finding to be very valuable as an assist for a purchaser when looking at temperament of a bull. We decided to include it in the lot block with a higher number being more favorable.*

*Below is the American Angus Associations definition.*

Expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

# Selection Tools

## Maternal Weaned Calf Value (\$M)

Maternal weaned calf value (\$M) is the most maternally-focused selection index currently available to Angus members and commercial users of Angus genetics. \$M, expressed in dollars per head, aims to predict profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves.

\$M places greater emphasis on the cost side of commercial cow-calf production than any tool available in the past. Increased selection pressure on \$M aims to decrease overall mature cow size while maintaining weaning weights consistent with today's production. Under \$M selection, less emphasis is placed on maternal milk, while heifer pregnancy and docility have an increased emphasis, and foot traits start to improve. The index finds cattle that are most profitable when producers receive no economic benefit for traits affecting post-weaning performance.

For example if Bull A has a \$M of +75 and Bull B has a \$M of +55 and both are mated to a comparable set of females, one would expect, on average, for Bull A's progeny to be \$20 more profitable per head for the cow/calf producer.

*EPDs directly influencing the index include: calving ease direct and maternal, weaning weight, maternal milk, heifer pregnancy, docility, mature weight as well as foot angle and claw set.*

## Weaned Calf \$Value (\$W)

Weaned calf value (\$W) provides the expected dollar-per-head difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Overtime, increased selection pressure on \$W will increase weaning and yearling weight traits while also continuing to increase mature cow size. As with any \$Value, \$W only has meaning when used in comparing the relative merit or ranking of two individuals.

*EPDs directly influencing \$W include: birth weight, weaning weight, maternal milk and mature cow size (MW).*

## Combined Value (\$C)

Combined Value (SC), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

## Heifer Pregnancy (HP)

*Another EPD that we have started watching very closely is Heifer Pregnancy. You will see it mentioned in our footnotes. A higher number is more favorable. We often times refer to it in % Ranking against the rest of the breed. In that situation, 1% is the best with 95% being the poorest.*

*Below is the American Angus Associations definition.*

A selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

# Don't buy an **imposter.**

Not all "Angus" bulls are **REGISTERED** Angus bulls.

If you see this logo in conjunction with an individual animal or group of animals, you know that that animal is registered with the American Angus Association and backed by the power of **data, programs** and **pedigrees** of the Association.

Invest wisely in those that carry the **Powered By Angus** logo.

Look for the **REGISTRATION NUMBER.**

# DEDICATED. COMMITTED.

WHOLE HERD REPORTING WITH MATERNALPLUS

## DEDICATED TO DATA.

Dedicated to Data. We devote extra time to collect maternal traits beyond those required to target greater performance and predictability. Our goal is to not only to improve our genetics today, but also prepare for the future of the Angus breed.

## COMMITTED TO IMPROVEMENT.

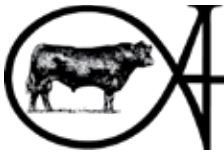

Raising quality registered Angus cattle takes commitment. As your genetic supplier, we take that seriously. That is why we believe a commitment to the female starts with Maternal Plus.

Contact AGI at 816-383-5100 or [agi@angus.org](mailto:agi@angus.org) for more information

# ANGUS

THE BUSINESS BREED

AAR is passionate about the mother cow and she truly lies at the heart of our program. The maternal characteristics of our herd heavily influence our end product to our customers - quality & predictable bulls that will add value and profitability for our customer.

**Maternal Plus**

**Maternal Plus™ is a voluntary program that emphasizes the importance of the female and maternal-focused EPDs. These will continue to improve the industry and add transparency for our customers.**

### Whole Herd Reporting

- We report a starting inventory for each animal every year.
- Report breeding dates and sires.
- Report animal disposal dates and reason, such as death or reason sold.

*This data is being used towards a longevity EPD to target animals whose offspring tend to 'stick around' longer. A long term producing cow is one of the most profitable units to a rancher's bottom line.*

### Foot Scores

- We score 2x annually: at weaning & at calving.
- Feet can change considerably in a year's time.

*We cull feet harder than any other trait – if an animal won't travel, they won't work.*

### Udder Score

- We score annually at calving.
- Our preferred evaluation is after the cow has calved, but before the calf nurses for the first time.
- We evaluate the teat size and udder suspension.

*Udder scoring plays into our culling decisions. We look for newborn calves to nurse without assistance.*

### Body Composition, Height, Weight & Disposition

- All 4 metrics taken annually at weaning.
- Reported annually to Association.
- Association can monitor the lifetime development of an animal.

*Continual reporting of this information aids in phenotypical assessment and decision making for our breeding and culling decisions.*

**Second Annual**  
**ARNTZEN ANGUS**

*Signature*  
**FEMALE SALE**

The fall of 2023 we held our second female sale and we couldn't be more excited about the future of it. We saw cows, bred heifers, and calves alike receive prices as good as any where else in the state. We feel the future is bright and

would like the opportunity to help you to market your females. The third annual commercial female sale will be on Friday, November 8, 2024 at Lewistown Livestock Auction. We're offering our customers a platform to market high quality replacement and bred females. We encourage cattle with a heavy influence of Arntzen Angus genetics or Angus bred to AAR bulls. The sale is a well-advertised event sponsored by Arntzen Angus.

Let us know if you are interested in consigning females. Any size consignment is welcome. Please let us know if we can assist with selections. Contact Kevin, Brad, Derik, or Kyle at Lewistown Livestock or Dan at Deichmann Livestock with questions or to get consignment details.

Hello Cattlemen and Cattlewomen;

Deichmann Livestock is proud to represent the Arntzen families providing marketing options to their bull and female customers. We are in the market year after year and have seen how the cumulative advantage of Arntzen genetics benefits their customers in their ranching operations and cow herds.

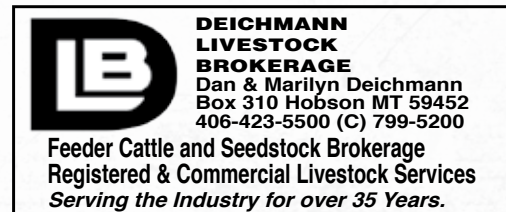

In this market atmosphere, quality always deserves a premium. Program cattle sell and generic bred feeder cattle bring less money. Program cattle sell. The interest is in feeders sired by program bulls. Our feeding clientele ask for premium feeder cattle that are consistently bred for uniform kind and quality. That's what you get with Arntzen's program, "It's selling power".

You owe it to yourself to be on hand sale day and walk the pens. This is a powerful display of bull power. If you can't make the sale, take a look at the offering when the bulls get to their yards. If you need assistance, please give me a call, and take advantage of our sight unseen guarantee on your purchases.

Give me a call anytime to check on the markets for your calves or yearlings. Give us an opportunity to buy your Arntzen bred calves. We're always in the market.

We hope to see you at the sale. Come up and visit if we haven't met.

Sincerely,  
Dan & Marilyn Deichmann  
Deichmann Livestock Brokerage

• Knudson has proven himself to be a very consistent breeder. Adding performance with extra length and rib. He stands on a really good set of feet and seems to pass that on to his progeny. His dam, AA R Blackbird 9044, has proven to be one of the best cows ever at AAR. She currently has 117 progeny reported and has produced 18 herd bulls going to seedstock operations.  
 • Knudson daughters are beautifully uddered, docile, and display excellent fleshing ability and rib.

- We can't say enough about Justified. Very few sires have influenced our herd like he has. We will breed to him again this spring for the 10th year. We can't have too many Justified daughters. Daughters are moderate framed, easy fleshing, feminine with very good udders and feet. He sires calving ease with excellent muscle shape and big scrotals. His 974 daughters currently have 1828 nursing ratios averaging 101.

- "0549" was retained from our 2020 calf crop. We selected him in large part because of the compatibility we have seen with our herd and Musgrave 316 Stunner. Those cattle have worked great for us and a cross on A A R Jeanne 1561, a 12 year old Justice daughter that is still actively working in our herd, is a can't miss pedigree. She is moderate with depth of rib, maternal strength and a great set of feet.

• Millars Duke 129 is a bull we were very excited to come across. We had been looking for a bull from the "Windy" line to bring back those great genetics and he fit perfect. "129" is the perfect blend of easy calving, good growth with a little extra frame to increase performance on a more moderate animal. He is sound made with good thickness and his daughters look great.

• We purchased Agenda with Math Farms out of the 2022 Woodhill sale  
• He has really excelled by siring exceptional foot quality and docility.  
• He is a legitimate calving ease bull that still puts a lot of muscle and shape in his calves.  
• He boasts an average birth ratio of 98 on 77 calves and average WR of 103 on 75 calves. He will be a big part of the future at AAR

• We selected Hannibal as our pick of the 2021 Pine Coulee Angus bull sale. We had been searching for a Charlo son to plug into our program and Hannibal fit just right. He stems from an outstanding dam, Pine Coulee Everelda W3, and we feel the cross on Onward was just right. She adds frame, fertility and structural soundness making a very attractive package. Look to H316 for calving ease, length and eye appeal.

The A A R Stunner 0549 calves have a lot of eye appeal. Moderate framed, big sided and extra length. This bull is out of our ET program. His dam has proven to be one of our top cows in large because year in and year out she brings in a great calf.

# Registered Heifers

## 20 ELITE REGISTERED HEIFERS

Offering 20 of our elite yearling heifers picked right off the top. All registered heifers have been Angus GS DNA tested to increase EPD accuracies and predictability. We will be offering to breed and pasture these registered heifers until mid-August at cost of \$250. Heifers will be guaranteed bred.

### Donation Heifer: Winifred FFA

We have selected Winifred FFA to be the recipient of half of the proceeds of this years donation heifer.

# ***Special Thanks*** to all of those who make our program successful!

***Thanks to Mike Vanek and his crew, and Karla Knox and Jolene Ehlert for their great job clipping the cattle. Amber Arntzen for advertisements and her work on the sale catalog. As well as George Fisher for his help parking cars on sale day.***

***Logan & Megan Tomschin***

***Brace & Haley Pingetzer***

***Dr. Bill Peebles & Brigit Flanagan, with the crew for fertility testing.***

***Doug, Todd and Kevin with Bruce and Linda Hould, owners of Hould Bull Development Center in Malta, MT. Thank you for all the hard work that you do in developing the bulls.***

***Kimberly Hansen, photographer, and crew***

***A special thank you for all of Todd Foran's help. He has been an important part of our operation for the last 45 years.***

# Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	28	Milk	33
Birth Weight	21	Mature Weight	11
Weaning Weight	26	Mature Height	8
Yearling Weight	21	Carcass Weight	9
Dry Matter Intake	8	Yearling Height	11
Scrotal Circumference	13	Carcass Marbling	9
Docility	10	Carcass Ribeye	12
Heifer Pregnancy	14	Carcass Fat	10

## How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k or i50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.

[www.angus.org](http://www.angus.org)

# Why Angus?

This chart demonstrates Angus cattle provide the best combination of growth, calving ease, and carcass traits relative to other breeds.

## Angus Offers the Best Combination of Growth and Calving Ease

*Average EPDs, 2014 Birth Year, Angus Base*

Breed	BW EPD	WW EPD	YW EPD	Milk
Angus	1.3	51	91	23
Hereford	5.6	40	49	3
Red Angus	1.2	26	53	23
Charolais	8.5	62	89	17
Gelbvieh	3.3	43	68	29
Limousin	3.6	45	51	13
Simmental	5.1	54	81	26

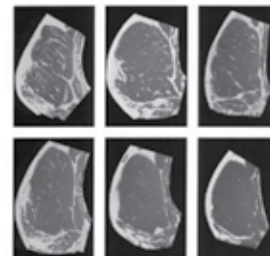

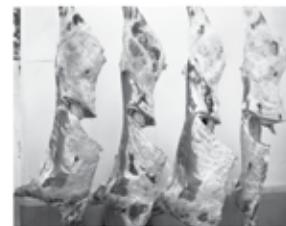

Kuehn and Thallman, 2016

## Angus is Highest for Marbling and Carcass Weight

*Average EPDs, 2014 Birth Year, Angus Base*

Breed	Marbling EPD	Carcass Weight EPD
Angus	0.59	33
Hereford	-0.22	2
Red Angus	0.18	11
Charolais	-0.29	30
Gelbvieh	-0.18	28
Limousin	-0.44	15
Simmental	-0.20	32

## **DELIVERY INSTRUCTIONS:**

# Sale Notes

**Thank you to all those who have made the last 48 years a wonderful success!**

*After 68 years of breeding Angus cattle, our philosophy at Arntzen Angus Ranch has stayed the same. We breed cows to be trouble free. They must be easy fleshing, high capacity cows with good feet and udders. Late calvers and poor dispositions are not tolerated. We want light birth weight and moderate framed calves, with exceptional growth and thickness. A strong emphasis is also put on maternal and carcass traits.*
